FAQ

Prologue

News reports begin to come in, speaking of cannibalism in the remote corners of the United States. Reports indicate that people were attacked by a group of roughly 10 people. The only evidence found were bits of torn flesh and bone. The grisly incidents continue to increase, with the epicenter being triangulated to an isolated mansion just outside the city limits.

Upon approaching the Mansion, however, you come under attack. Your aggressors seem unfazed by your attacks, and you retreat into the mansion. Unable to go back the way you came, will you be able to forge ahead, find a way out and, most of all, escape with your life? Welcome to the Survival Horror....

Chapter I. Game Concept

Welcome to the Resident Evil™ Deck Building Game. This is a game where you build up a deck from meager beginnings. The deck you build represents your Inventory, whether that includes Medical Supplies, Weapons, or Ammunition. Your deck will be your lifeline to survival.

Chapter II. Card Analysis

(1) CHARACTER CARD

Character cards are used to battle against the Infected you encounter throughout the game. Each Character has special effects that could change the game when used.

All Characters have a base damage of 0. (See pg 12 for new Base Damage Rule)

Ⓐ Card Type

Ⓑ Starting and Maximum Health: This shows the starting Health of this Character. This also represents the starting Maximum Health of this Character.

Ⓒ Character Name

Ⓓ Levels & Decoration Requirements: This shows the Decorations required to be the Level indicated. (See Pg 15 for Level Up and Decorations)

Ⓔ Effects: These are the special effects of this Character. Character effects which use the word “can” in them can only be used once during their noted timing. So use them carefully!

(2) AMMUNITION CARD

Ammunition serves as the Basic Resource Players need to use their Weapons and to gain Gold to Buy other Resources.

Ⓐ Card Type

Ⓑ Cost to Buy

Ⓒ Name

Ⓓ Bonus Icons: These show any additional bonuses the Ammunition gives. In the example, this Ammunition gives +10 Ammo and +10 Gold.

(3) WEAPON CARD

Weapon cards are used in battle to deal Damage to the Infected. Most Weapons have an Ammo Requirement that you need to fulfill in order to deal Damage. Weapons will be your primary Resource used to deal Damage to the Infected.

Ⓐ Card Type

Ⓑ Cost to Buy

Ⓒ Weapon Name

Ⓓ Weapon Type

Ⓔ Ammo Requirement: This shows how much Ammo is needed to use the Weapon.

Ⓕ Damage: This shows how much Damage this Weapon deals when used.

Ⓖ Weapon Effect: The special effect the Weapon provides, if any. Weapon effects are activated when the Weapon is used.

(4) INFECTED CARD

Infected cards are only in the Mansion (See Pg 07 for Mansion). As Players Explore the Mansion, they have a high chance of encountering the Infected. When they do, they must Battle and defeat them using whatever Weapon cards they have, lest they be permanently incapacitated.

Ⓐ Card Type

Ⓔ Infected Name

Ⓒ Health

Ⓓ Effect: This shows the special effects this Infected has, if any.

Ⓑ Damage: This shows how much Damage it deals to the Exploring Character if it is not Defeated in battle.

Ⓕ Decoration Reward: This shows how many Decorations the Infected provides once Defeated. The stronger the Infected is, the more Decorations your Character earns.

Chapter II. Card Analysis (cont.)

(5) ITEM CARD

Item cards have useful effects like healing or increasing the Maximum Health of Characters. Certain Items can only be found in the Mansion. Use them correctly to achieve an advantage over other Players.

- Ⓐ Card Type
- Ⓑ Cost to Buy
- Ⓒ Item Name
- Ⓓ Effect: The special effect it gives to the Player.

(6) ACTION CARD

Action cards have powerful effects that provide bonuses that Players will need in their quest to defeat the Infected.

- Ⓐ Card Type
- Ⓑ Cost to Buy
- Ⓒ Action Name
- Ⓓ Effect: The special effect it gives to the Player.
- Ⓔ Bonus Icons: The extra bonuses you are getting during the turn the card is played. Apply these Bonus Icons before applying the effect.

(7) EVENT CARD

Event cards represent special occurrences or findings that you will encounter while Exploring the Mansion.

- Ⓐ Card Type
- Ⓑ Event Name
- Ⓒ Effect: The special effect that occurs when the card is Revealed.

New!! Only for OUTBREAK MODE (see pg 8)

(8) INFECTION CARD

Infection cards can only be used by an Infected Character when Attacking other Characters. Each Infection card provides unique advantages that normal cards cannot. Players with Infected Characters may use any number of Infection cards from their Hand when they Attack another non-Infected Character.

- Ⓐ Card Type
- Ⓑ Infection Name
- Ⓒ Infection Effect: The special effect the Infection provides, if any. Infection effects are activated when the Infection card is used.
- Ⓓ Damage: This shows how much Damage this Infection deals when Attacking other non-Infected Characters.

New!! Only for OUTBREAK MODE (see pg 8)

(6) INFECTED CHARACTER

Infected Characters are only available to Players whose Character dies to the Infection. Infected Characters primarily use Infection cards to deal Damage to other Characters

- Ⓐ Card Type
- Ⓑ Starting and Maximum Health: This shows the starting Health and Maximum Health of this Character.
- Ⓒ Character Name
- Ⓓ Effects: These are the special effects of this Character. Character effects which use the word “can” in them can only be used once during their noted timing. So use them carefully!
- Ⓔ Base Damage: The Damage the Infected Character deals when it Attacks or when it is Attacked and not Defeated.

Chapter III. Things you need to play

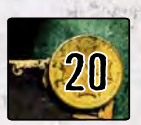

o 1-4 Players

o Game counters (dice, loose change, etc) or a pen and paper to keep track of the Health of the Characters.

Chapter IV. Field Layout

The area in the center is referred to as the Resource Area Ⓐ and 18 different card piles (known as Resource Piles) are placed here, face up. All the cards in this area are referred to as Resources in the game. Players can Buy these cards by paying their Buying cost. For example, the Buying cost of the "Green Herb" is 20.

Depending on which Scenario you play, different Resources are placed in the Resource Area. (See Pg. 19 for Scenarios) However, there are certain cards you need in every game. The following cards are the **[Basic Resources]** and are placed in the Resource Area for every game. The Basic Resources are:

BASIC RESOURCE PILES:

(1) "Ammo X 10"
(2) "Ammo X 20"
(3) "Ammo X 30"
(4) "Green Herb"
(5) "Handgun" & "Burst-Fire Handgun"*
(6) "Combat Knife" & "Survival Knife"*

*Combine and shuffle them into a pile

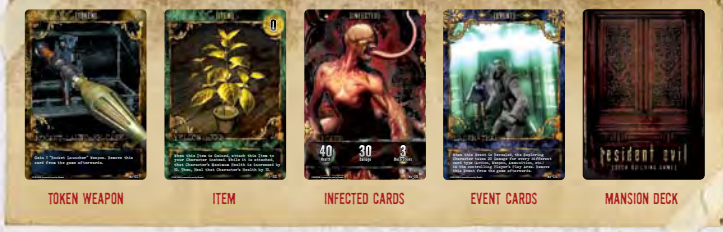

Basic Resources

*As you can see, piles (5) and (6) have 2 different kinds of cards in them. All of the noted cards should be shuffled into the same pile before placing them in the Resource Area.

Each Player has their own Play Area Ⓑ, Discard Pile Ⓒ and Inventory Area Ⓓ. Whenever a Player plays a card from their Hand, it is placed in their Play Area face up. At the end of each Player's turn, the Player discards all the cards they played that turn, and the ones in their Hand to their Discard Pile. Whenever a Player Buys or Gains a card, it is also moved to their Discard Pile right away.

Another area called the Mansion Area Ⓔ is added next to the Resource Area. The Mansion includes powerful Weapons, Items, and various Events, along with the vicious Infected. Shuffle the following cards into a pile and place it next to the Resource Area, keeping it face down.

Chapter V. Basic Game Setup

(1) DECIDE WHO GOES FIRST!
Randomly determine the first Player. If playing multiple games in a row, randomly determine the starting Player from all Players that lost the previous game. Play continues clockwise from the Player who went first.

(2) PICK A CHARACTER!
Randomly deal out 2 Character cards to each Player. Each Player chooses 1 of these Characters to play as and removes the other Character card from the game.

Chapter VI. Game Modes

(GAME MODE 1) OUTBREAK MODE

PLAYERS NEEDED: 1 TO 4 PLAYERS
ESTIMATED PLAY TIME: 45 MIN TO 1 HOUR

It begins with a simple biological imperative: the need to feed. Moving to your stomach, the virus worms its way into your blood stream, attaching itself to your cells and taking them over from the inside out, ordering the cell to replicate, creating copies of the Virus. Higher brain function, being comprised of cells with little to no defense, is destroyed first, leaving only primal instinct. Over and over, the virus replicates itself, destroying cells and converting the cell parts into pure energy, allowing the organism to continue its basic need to eat.

Suddenly the Virus is introduced to something new: a fresh organism has just come into contact with it, and the process begins anew...

STEP 1: SET UP THE "OUTBREAK" OR THE "DAWN OF NIGHTMARES" SCENARIO!

Outbreak Mode is meant to be played with any combination of cards. You can play with as few as 18 Resource Piles, or as many as you want. For the first time you play, start with the "Outbreak" Scenario if you own "Resident Evil™: The Deck Building Game" or "Dawn of Nightmares" if you own "Resident Evil™: Alliance":

"OUTBREAK" RESOURCES (RE:DBG BASE SET AND OUTBREAK):

- o [Basic Resources]
- o Bolt-Action Rifle & Semi-Automatic Rifle*
- o Lightning Hawk & Hand Cannon*
- o Stun Rod
- o Pump-Action Shotgun & Automatic Shotgun*
- o Injection
- o "I Have This..."
- o Mansion Foyer
- o Wesker's Secret
- o Power of the t-Virus
- o Deadly Aim
- o The Merchant
- o Shattered Memories
- o Escape From The Dead City

**Combine and shuffle them into a pile.*

"DAWN OF NIGHTMARES" RESOURCES (RE:ALLIANCE AND OUTBREAK):

- o [Basic Resources]
- o Telescopic Sight Rifle
- o Riot Shotgun & Triple Barreled Shotgun*
- o Quirk of Fate
- o "I Have This..."
- o Power of the t-Virus
- o Wesker's Secret
- o Fierce Battle
- o Gathering Forces
- o Desperate Escape
- o Lightning Hawk & Hand Cannon*
- o Injection
- o Russian Assault Rifle & Signature Special*

**Combine and shuffle them into a pile.*

Take all of the Resource Piles from the Scenario you chose and add them to the Resource Area.

STEP 2: HAVE THE STARTING INVENTORY AND HAND READY!

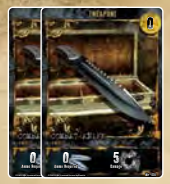

Each Player takes the following cards from the Resource Area. Leave the remainder in the Resource Area, if there is any:

7 x Ammo x10 cards

1 x Handgun

2 x Combat Knife

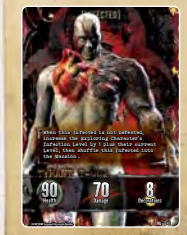

Each Player shuffles these 10 cards together and places the pile face down in front of them. These cards are referred to as their Inventory. Then, each Player draws 5 cards from the top of their Inventory as their starting Hand.

(A) GAME END AND VICTORY CONDITION: EARN THE MOST DECORATIONS BEFORE "TYRANT T-002" IS DEFEATED!

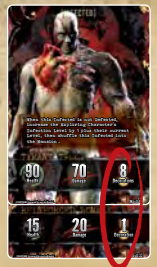

The game ends as soon as a Character Defeats the most powerful Infected in the Mansion. In this expansion, the most powerful Infected is "Tyrant T-002".

Once "Tyrant T-002" has been Defeated, each Player will total up their Decorations. **The Player with the most Decorations is the winner.** If Players' are tied for most Decorations, then the Player with the most Health at the moment the game ended is declared the winner. If they are tied, then all (both) of them are the winners.

Tyrant T-002

If every Player's Character is either Permanently Defeated and/or is an Infected Character, the game ends, and all Players total up their Decorations to determine the winner as if "Tyrant T-002" had been Defeated.

THE INFECTION DECK, MAXIMUM INFECTION LEVEL, INCREASING/ DECREASING INFECTION LEVEL

Take all of the Infection cards, shuffle them together, and put them face down above the Mansion. This is referred to as the Infection Deck, and will be used frequently in OUTBREAK MODE. Each Character has an Infection amount to keep track of while playing OUTBREAK MODE, known as "Infection Level". All Characters have a Maximum Infection Level of 10. A Character's Infection Level is increased at the end of the turn that they did not Explore or Attack an Infected Character. Card effects can increase Infection Level as well.

When a Character's Infection Level increases, move 1 card from the top of the Infection Deck and place it face up next to your Character. Likewise, when a Character's Infection Level decreases, move 1 of the face up Infections next to that Character to the bottom of the Infection Deck.

If at any time a Character's Infection Level meets or exceeds their Maximum Infection Level, they instantly die, and reanimate as an Infected Character. Please see the BECOMING THE INFECTED section for details (pg. 15). If a Character dies due to Damage, proceed to revive as detailed in the PENALTY FOR LOSING ALL YOUR CHARACTER'S HEALTH section (pg. 15)

((B) GAME FLOW: 1 ACTION, 1 BUY, 1 EXPLORE, DISCARD EVERYTHING AND DRAW 5 AT THE END!

Each Player begins their turn with the following:

o 1 ACTION o 1 BUY o 1 EXPLORE

The Player may do any of the following 5 options in any order they wish:

(1) Play an Action(s)

(2) Play an Item(s) and/or Ammunition(s) (or Infection card if you are an Infected Character)

(3) Activate a Character's Effect(s)

(4) Explore the Mansion

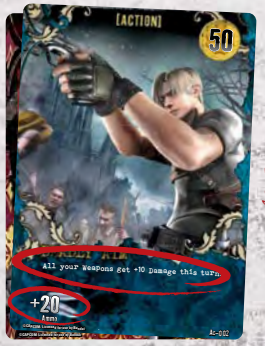

(5) Buy a Resource (s)

*You do NOT have to perform any of these if you do not want to.

1) PLAYING ACTION(S)

Each Player begins their turn with 1 Action. Playing an Action card uses 1 Action, but some cards allow a Player to get more Actions during their turn, allowing for more Actions to be played in a single turn.

To play an Action, place the card from your Hand face up in your Play Area, then perform any effects that are listed on the Action, starting with the Bonus Icons first, then the effects.

ACTION CARD

A Player must finish all effects of the current Action before another card can be played. If a Player cannot perform all of the listed effects, then the Player does as much as they can. Any Action played remains in their Play Area until the end of their turn.

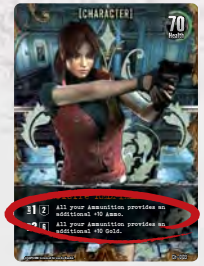

*Some Actions provide additional Ammo, Gold, Buys or Actions. Don't forget to add these amounts in prior to Exploring or Buying for your turn.

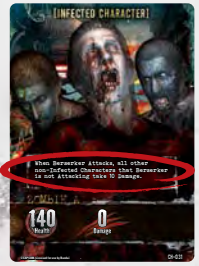

ITEM CARD

INFECTION CARD

CHARACTER CARD

INFECTED CARD

(2) PLAYING ITEM(S) & AMMUNITION

To play an Item, place the card from your Hand face up in your Play Area, then do any effects that are listed on the Item. If a Player cannot perform all of the listed effects, then the Player does as much as they can. When you play Ammunition, apply the bonus effects first, then the written effects (if any). Remember that Gold and Ammo are a total that disappears at the end of the turn, so using all of your Ammunition is usually a good idea. Any Items and Ammunition played remains in that player's Play Area until the end of the turn. You can play as many Items and Ammunition as you want to during your turn.

PLAYING INFECTIONS

The Infection card is a card that is useless while your Character is alive, but integral to your survival while Infected. Most Infections have additional effects when you use them. Infected can only use Infections when they Attack, but can use as many as they want. Non-Infected Characters cannot use Infections.

(3) ACTIVATING A CHARACTER'S EFFECT(S)

To activate a Character's effect, the timing needs to be correct. If it is, you can activate it. There are some permanent effects that are active as long as you are meeting certain conditions. For the timing of the effects, read each effect carefully to determine when you can activate them. A Character's effect with the word "can" in it may only be activated once during its noted timing per turn.

NEW All Characters & Infected Characters have a base Damage of 0 if not shown otherwise. Some Characters in Resident Evil™ have the ability to increase their Damage, turning their own typically non-lethal bodies into Infected slaying machines!

INFECTED CHARACTERS

Infected Characters cannot use the majority of cards in the game, but they are the only Characters who can use Infection cards.

o During their turn, The Player controlling Infected Characters:

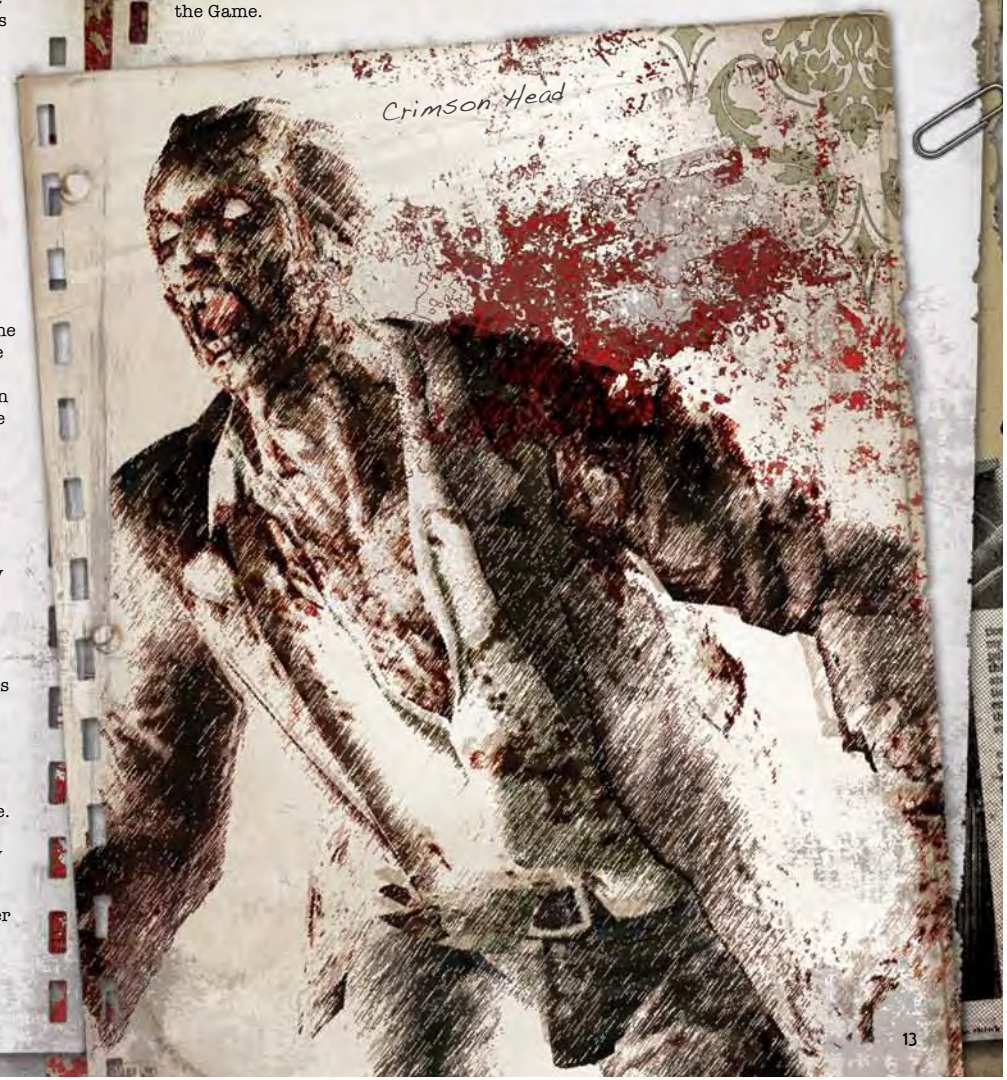

a) Have 0 Buys
b) Have 0 Actions
c) Have 1 Explore
d) Cannot play Weapons unless stated otherwise.
e) Cannot play Items unless stated otherwise.
f) Cannot raise/lower their Infection Level by any means.

Infected Characters have effects, but their true power comes from the Infections. Infected Characters may only use Infections when they Attack another non-Infected Character.

INFECTED CHARACTERS (CONT.)

Infected Character CANNOT Attack other Infected Characters and CANNOT Explore the Mansion. If an Infected Character dies, that Infected Character's Player is now out of the game. The Player controlling the Character who killed that Infected Character takes the Infected with the highest Decoration value that was attached to the Infected Character, attaches it to their Character and adds its Decoration value to their total.

If an Infected Character kills a non-Infected Character, whether by Infection or by Damage, the Player controlling the Infected Character randomly chooses an Infected attached to that Character and Removes that chosen Infected from the Game.

(4) EXPLORING THE MANSION

When a Character Explores the Mansion, do the following:

1) Announce that you are Exploring.

2) Play and declare any Weapons your Character will be using.

Each Weapon can only be used once, unless stated otherwise.

3) Meet Ammo Requirement on the Weapons being used. Add up your Ammo from all of the cards in your Play Area and assign any amount of that Ammo to each Weapon being used.

4) Total up the amount of Damage that your Character is dealing by adding up your Weapon's Damage, Character's Damage, and any effects provided by other cards.

5) If any Weapons being used have any effects, they must be used at this moment.

Example

James declares that he is going to Explore the Mansion. He plays a Combat Knife and a Handgun, and notes the 20 Ammo he received from Ammo x20, giving James' Character a total of 15 Damage.

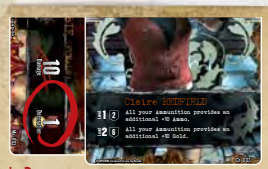

After performing the above, Reveal the top card of the Mansion. If an Infected is Revealed, note any effect on the card. If it has an effect, apply it when the effect says so. (See Example A.)

If the Character's Damage total meets or exceeds the Infected's Health, then the Infected is Defeated. The Infected itself is attached to the Player's Character, and its Decoration Reward value is added to that Character's total. (See Example B.)

Example A

James Reveals the top card of the Mansion, which turns out to be a Zombie (Female).

Example B

James' 15 Damage equals the 15 Health on the Zombie (Female), and he attaches the Infected to his Character, adding its Decorations to his total. The Zombie (Female) also allows James to select another Player and deny that Player the ability to play Actions during their next turn

LEVEL UP!

When a Character has obtained a certain amount (or more) of the indicated Decorations, that Character "levels up", giving you access to more powerful effects to aid you in your escape. When a Character becomes Level 2, that Character has all of the effects of Level 1 as well as Level 2.

Should a Character fail to Defeat the Revealed Infected, the Infected lashes out and Attacks the Character, dealing the indicated Damage amount (plus any modifiers) to the Character. The Revealed Infected is moved to the bottom of the Mansion afterwards. Note that some Infected have effects when they are NOT Defeated. Be sure to apply these effects.

Example

Instead of a Zombie (Female), James runs into the Hunter. James' 15 Damage is not enough to beat the Hunter. He takes 30 Damage, applies the Hunter's effect, which forces James to randomly Trash 2 cards from his Discard Pile, then moves the Hunter to the bottom of the Mansion.

PENALTY FOR LOSING ALL YOUR CHARACTER'S HEALTH

If your Character's Health is reduced to 0 or less, then that Character has been fatally injured in their conquest. Turn the Character face down and shuffle together all the cards in your Hand, Player Area and Discard Pile into your Inventory. Then, place your Inventory face down in front of you. All cards currently attached to your Character remain attached to your Character. A face down Character is considered to be out of the game, meaning that they cannot be targeted by effects or have their Infection Level raised for any reason. When your turn comes around, flip your Character face up. **Reduce the maximum Health of your Character by 20**, Heal your Character to your new maximum Health amount, draw 5 new cards from your Inventory, and end your turn.

During this process, your Infection Level does not increase. If your Character's Maximum Health is 0 or less at this point, your Character is Permanently Defeated and your game is over. Keep all cards you have Gained throughout the game in front of you until the game is over.

BECOMING THE INFECTED

When your Character's Infection Level becomes 10 or higher, they die instantly. Shuffle your cards together (including the Infections that were next to the Character). If it is your turn, it ends immediately. Remove your Character card from the Game, along with all non-Infected cards that were attached to that Character. If your Character simultaneously has 0 Health and an Infection Level of 10 or higher, do the same as if your Infection Level was only 10 or higher. If their new maximum Health is 0 and their Infection Level is 10 or higher, your game is over. Choose an Infected Character at random and when your turn comes around, turn that Infected Character face up, with all your Decorations attached to it, draw 5 cards, and continue your turn as normal.

EXTRA EXPLORE

Some Weapons, like Shotguns, allow a Character to Explore multiple times in a turn. If a Player has multiple Explores, they can use 1 Explore at a time, or all at once. If multiple Infected are Revealed all at once, the Player's total Damage must exceed or equal the Revealed Infected's combined Health.

If it does not, then the Character receives the total Damage of all the Revealed Infected. Afterwards, all Revealed Infected that were not Defeated are moved to the bottom of the Mansion in a random order.

Example

Tylar has 60 Ammo and his Character is using a Riot Shotgun which deals 45 Damage. He uses 1 Explore and Reveals Mimicry Marcus, which has 30 Health. He decides to use his 2nd Explore and Reveals Licker, which has 40 Health. Since their total Health is greater than Tylar's Character's 45 Damage, both Infected deal 50 Damage to Tylar's Character (30 from the Licker & 20 from Mimicry Marcus).

Players can also choose to Explore 1 at a time. While this way is much safer, you also require more weaponry this way, since Weapons apply their whole Damage only on the Explore when they are used and can only be used once per turn

Example

Alex has 40 Ammo and is using a Shotgun which deals 25 Damage. He uses his first Explore and Reveals a Kipepeo, which has 20 Health. Alex decides to stop, and adds the Kipepeo to his Decorations. Later in the turn, Alex decides to use his 2nd Explore, playing 2 Knives and a Handgun, for a total of 20 Damage. Alex Reveals the Zombie (Male), which has 20 Health. Alex defeats the Zombie (Male) and also adds it to his Decorations.

NON-INFECTED CARDS

Sometimes Events, Weapons, or Items can be found when Exploring the Mansion instead of an Infected. In this case, when the non-Infected card is Revealed, perform the effect(s) listed on the card.

(5) INFECTED CHARACTERS AND ATTACKING

Players can choose to use 1 Explore to Attack an Infected Character during their turn. Follow all of the same rules detailed in EXPLORING THE MANSION (pg. 14), except do not Reveal the top card of the Mansion, and instead deal your Damage to the Infected Character. If you fail to reduce the Infected Character's Health to 0 or less, your Character takes the Infected Character's base Damage.

Infected Characters can also follow the same rules above to Attack non-Infected Characters.

(6) BUYING RESOURCES

When Buying, a Player can spend their Gold gained for the turn to Buy Resources in order to aid them in upcoming battles. The Buying cost of each card is located in the upper right hand corner.

If the Player has multiple Buys, they combine the total amount of Gold they have for the turn before Buying. This total amount is used to pay for everything they Buy this turn. Buys are done one at a time. Here is an example of Buying Resources during a turn.

Example

After playing his Ammunition and Action, Andy has a total of 50 Gold to Buy with and 2 Buys this turn. Andy chooses to first Buy the Handgun:

After moving the Handgun to his Discard Pile, the next card in the Pistol Resource Pile is revealed to be the powerful Burst-fire Handgun. Seeing that the Burst-fire Handgun costs 60 Gold to Buy, Andy finds himself too low on Gold to Buy it. Instead, Andy chooses to use his 2nd Buy to Buy a Green Herb:

(7) END OF TURN PROCEDURE

At the end of a Player's turn, the Player must Discard all cards in their Play Area that aren't attached to their Character(s) and all remaining cards in their Hand. Then draw 5 new cards. At this point, if the active Player did not Explore the Mansion or Attack an Infected Character this turn, increase the Infection Level of their Character by 1. Once a Player has completed drawing a new Hand of 5, play is passed to the Player to the left.

*Any time a Player needs to draw cards but cannot because of an insufficient amount of cards in their Inventory, they draw as many as they can, shuffle their Discard Pile, then place it in their Inventory Area face down, and draw the rest.

(8) ADDITIONAL OUTBREAK MODE OPTIONS

Resident Evil™: The Deck Building Game with Outbreak

Use the following Scenarios if you have the Resident Evil™: The Deck Building Game along with Resident Evil™: Outbreak.

"INFECTION BALANCE" RESOURCES:

- o [Basic Resources]
- o Longbow
- o Bolt-Action Rifle & Semi-Automatic Rifle
- o Ominous Battle
- o By Any Means Necessary
- o Deadly Aim
- o Escape From the Dead City
- o Item Management
- o Power of the t-Virus
- o Injection
- o Shattered Memories
- o Lightning Hawk & Hand Cannon*
- o Pump-Action Shotgun & Automatic Shotgun*

Combine and shuffle them into a pile.

Learn to master the Virus within you in order to get the most out of this Scenario.

"DUPLICITY" RESOURCES:

- o [Basic Resources]
- o Standard Sidearm & Samurai Edge*
- o Reload
- o Stun Rod
- o Deadly Aim
- o Bolt-Action Rifle
- o Returned Favor
- o Escape From the Dead City
- o Injection
- o Shattered Memories
- o Submission
- o Lightning Hawk & Hand Cannon*
- o Pump-Action Shotgun & Automatic Shotgun*

Combine and shuffle them into a pile.

Sometimes having multiple copies of the same card isn't a bad idea....

"EMBRACE THE DARKNESS" RESOURCES:

- o [Basic Resources]
- o Grenade
- o By Any Means Necessary
- o Ominous Battle
- o Deadly Aim
- o Power of the t-Virus
- o Six Shooter
- o Shattered Memories
- o The Gathering Darkness
- o Higher Priorities
- o Submission
- o Bolt-Action Rifle & Semi-Automatic Rifle*
- o Pump-Action Shotgun & Automatic Shotgun*

Combine and shuffle them into a pile.

Being an Infected isn't all that bad..... is it?

Resident Evil™: Alliance with Outbreak

Use the following Scenarios if you have Resident Evil™: Alliance along with Resident Evil™: Outbreak.

"QUICK GAME" RESOURCES:

- o [Basic Resources]
- o Russian Assault Rifle & Signature Special*
- o Parting Ways
- o Riot Shotgun & Triple Barreled Shotgun*
- o Lightning Hawk & Hand Cannon*
- o Great Ambition
- o Treasure
- o Quirk of Fate
- o Fierce Battle
- o Returned Favor
- o Gathering Forces
- o Flamethrower
- o Blowback Pistol

Combine and shuffle them into a pile.

Don't have the full hour to play? Use this Scenario!

"TROUBLE AROUND EVERY CORNER" RESOURCES:

- o [Basic Resources]
- o Russian Assault Rifle & Signature Special*
- o Blowback Pistol
- o "I Have This..."
- o Standard Sidearm & Samurai Edge*
- o Riot Shotgun & Triple Barreled Shotgun*
- o Uroboros Injection
- o Lightning Hawk & Hand Cannon*
- o Quirk of Fate
- o Stun Rod
- o The Gathering Darkness
- o Wesker's Secret
- o Gathering Forces

**Combine and shuffle them into a pile.*

Find inventive ways to keep your opponent's away from winning!

"RESIDENT REAPER" RESOURCES:

- o [Basic Resources]
- o Blowback Pistol
- o Standard Sidearm & Samurai Edge*
- o Flamethrower
- o Injection
- o Lightning Hawk & Hand Cannon*
- o Stun Rod
- o Quirk of Fate
- o Russian Assault Rifle & Signature Special*
- o Flash Grenade
- o Fierce Battle
- o Telescopic Sight Rifle
- o Riot Shotgun & Triple Barreled Shotgun*

**Combine and shuffle them into a pile.*

Arm yourself to the teeth with this near Weapons only setup

ADVANCED NOTE 1: CUSTOM RESOURCES

As Players become more experienced, they may wish to try their own combination of Resources. Allow each Player to pick one of the Resource Piles one at a time, until you have 18 Resource piles total. It is advised that you always play with the Basic Resources.

ADVANCED NOTE 2: ALTERNATE PLAY DIFFICULTY

Use the below if you feel that the above setups are not suitable enough to meet your demands:

Easy Difficulty: All Infected get -10 Health, -10 Damage, and their effects are not active.

Hard Difficulty: Characters die to the Infection at an Infection Level of 8 instead of 10. They still shuffle 10 Infections into their Inventory when they become an Infected.

Professional Difficulty: Character's Infection Level increases by 1 at the end of their turn, regardless of whether they Explored or not.

ADVANCED NOTE 3: CUSTOM STARTING INVENTORIES

Players can also play with the Custom Starting Inventories in order to enhance the flavor of the game even more. You can find these Custom Starting Inventories under the MERCENARY MODE section. (pg. 24)

ADVANCED NOTE 4: RESIDENT EVIL™ EXPANDED

Own both the first and second copies of the Resident Evil™: Deck Building Game, along with Outbreak? Try out these Scenarios for a more diverse gaming experience!

"EXPLOSIONS AND FLAMES" RESOURCES:

- o [Basic Resources]
- o Grenade
- o Flamethrower
- o Submission
- o Night Scope Rocket Launcher
- o Desperate Escape
- o Stun Rod
- o Shattered Memories
- o By Any Means Necessary
- o Treasure
- o Standard Sidearm & Samurai Edge*
- o Longbow
- o Russian Assault Rifle & Signature Special*

**Combine and shuffle them into a pile.*

Hardly any Ammo is required in this quirky Scenario.

"MEGA MONEY" RESOURCES:

- o [Basic Resources]
- o Item Management
- o The Merchant
- o Six Shooter
- o Parting Ways
- o Flamethrower
- o Riot Shotgun & Triple Barreled Shotgun*
- o Treasure
- o Shattered Memories
- o Gathering Forces
- o Longbow
- o Lightning Hawk & Hand Cannon*
- o Returned Favor

**Combine and shuffle them into a pile.*

You can never have too much cash, stranger...

"A GUN IS A GUN" RESOURCES:

- o [Basic Resources]
- o Grenade, Flash Grenade, Grenade Launcher*
- o Blowback Pistol, Standard Sidearm & Hand Cannon*
- o Power of the t-Virus
- o Six Shooter, Lightning Hawk & Hand Cannon*
- o Russian Assault Rifle, Signature Special, Assault Machine Gun & Full-Bore Machine Gun*
- o Wesker's Secret
- o Pump-Action Shotgun, Automatic Shotgun, Riot Shotgun & Triple Barreled Shotgun*
- o Bolt Action Rifle, Semi-Automatic Rifle & Telescopic Sight Rifle*
- o Higher Priorities
- o Escape from the Dead City
- o Shattered Memories
- o Gathering Forces

**Combine and shuffle them into a pile.*

Pushing all Weapon types into the same Resource Pile gives Players a much different game than normal...

ADVANCED NOTE 5: THE DAY-KILLER

Feel like Resident Evil™ action all day long? Combine the Mansions from Resident Evil™: The Deck Building Game, Resident Evil™: Alliance, and Resident Evil™: Outbreak and rejoice in the Infected hunting fun! The game ends when "Albert Wesker", "Uroboros Aheri", and "Tyrant T-002" have been defeated.

(GAME MODE 2) MERCENARY MODE

PLAYERS NEEDED: 2 TO 4 PLAYERS
ESTIMATED PLAY TIME: 30 MIN TO 45 MIN

You and your Team have been dropped into the middle of a huge mob of Infected. Your mission: destroy everything around you in a quick and timely manner. For every Infected Defeated, you have been promised a greater reward for your bravery.

NEW CARDS!

With MERCENARY MODE, a new card type is introduced, exclusive to this mode:

BONUS CARD
Bonus cards are used only in MERCENARY MODE. This card can only be found in the Mansion.

Ⓐ Card Type

Ⓑ Card Name

Ⓒ Effect: When this card is Revealed from the Mansion and the Player decides to Gain it, perform this effect.

STEP 1: PICK A SCENARIO!

Any Scenario from OUTBREAK MODE can be used for this game mode, or you can choose from one of the below:

Resident Evil™: The Deck Building Game & Outbreak Mercenary Scenarios:

"SPECIAL FORCES" RESOURCES:

- o [Basic Resources]
- o First Aid Spray
- o Pump-Action Shotgun & Automatic Shotgun*
- o Shattered Memories
- o Grenade
- o Six Shooter
- o Umbrella Corporation
- o Deadly Aim
- o Reload
- o Returned Favor
- o Parting Ways
- o Ominous Battle
- o Assault Machine Gun & Full-Bore Machine Gun*

**Combine and shuffle them into a pile.*

Being quick on your feet and managing your Teams Inventory will be the key to this battle. If you find yourself running low on Health, you can always have one of your teammates Buy a First Aid Spray.

"JACK OF ALL TRADES" RESOURCES:

- o [Basic Resources]
- o Escape From the Dead City
- o Shattered Memories
- o Six Shooter
- o Pump-Action Shotgun & Automatic Shotgun*
- o Bolt-Action Rifle & Semi-Automatic Rifle*
- o Grenade
- o Item Management
- o Parting Ways
- o Deadly Aim
- o "I Have This..."
- o Returned Favor
- o Assault Machine Gun & Full-Bore Machine Gun*

**Combine and shuffle them into a pile.*

A little bit of everything can be found in this Scenario

"LIMITED MOVEMENT" RESOURCES:

- o [Basic Resources]
- o Bolt Action Rifle & Semi-Automatic Rifle*
- o Pump-Action Shotgun & Automatic Shotgun*
- o The Merchant
- o Item Management
- o "I Have This..."
- o Master of Unlocking
- o Deadly Aim
- o Returned Favor
- o Shattered Memories
- o Grenade
- o Lightning Hawk & Hand Cannon*
- o Assault Machine Gun & Full-Bore Machine Gun*

**Combine and shuffle them into a pile.*

Make no wasted movements as your Team will be down to one or two Actions per turn. Make every card count and you will come out victorious!

Resident Evil™: Alliance & Outbreak Mercenary Scenarios:
Use the following Scenarios if you have the Resident Evil™: Alliance along with Resident Evil™: Outbreak.

"INFESTED SUPPLY DEPOT" RESOURCES:

- o [Basic Resources]
- o Stun Rod
- o Riot Shotgun & Triple Barreled Shotgun*
- o Great Ambition
- o Flamethrower
- o Standard Sidearm & Samurai Edge*
- o Quirk of Fate
- o Uroboros Injection
- o Gathering Forces
- o Desperate Escape
- o Fierce Battle
- o "I Have This..."
- o Russian Assault Rifle & Signature Special*

**Combine and shuffle them into a pile.*

Featuring all the Weapons you could ever need, this abandoned Supply Depot guarantees one thing: Mass Destruction.

"INFESTED SHOPPING MALL" RESOURCES:

- o [Basic Resources]
- o Telescopic Sight Rifle
- o Riot Shotgun & Triple Barreled Shotgun*
- o Great Ambition
- o Partners
- o Star-crossed Duo
- o Quirk of Fate
- o Red Herb
- o Lightning Hawk & Hand Cannon*
- o Desperate Escape
- o Fierce Battle
- o Treasure
- o Russian Assault Rifle & Signature Special*

**Combine and shuffle them into a pile.*

Welcome to Raccoon City Mall, where anything great is located, everything is on sale, and everyone greets you with rotting teeth and a monstrous hunger! We've got what cures your hunger for Infected destruction!

STEP 2: MODIFY THE MANSION!

Remove the following cards from the Mansion of OUTBREAK MODE:

- o "Laser Trap"
- o "Kevlar Jacket" (1 total)
- o "Tyrant T-002"
- o "Rock Trap"
- o "Lisa Trevor"
- o "Antivirus (2 total)"

Then, add the Bonus cards to the Mansion. Shuffle up the entire Mansion, and place it in the Mansion Area.

STEP 3: PREPARE THE CUSTOM STARTING INVENTORY!

Each Character card has a Custom Starting Inventory that they start with. Custom Inventories are detailed below:

ADA WONG	8x Ammo x10, 1x By Any Means Necessary, 1x "I Have This..."
CHRIS REDFIELD	7x Ammo x10, 1x Combat Knife, 2x Standard Sidearm
DAVID KING	4x Ammo x10, 6x Combat Knife
EXCELLA GIONNE	8x Ammo x10, 1x Power of the t-Virus, 1x By Any Means Necessary
JILL VALENTINE	7x Ammo x10, 2x Standard Sidearm, 1x Proximity Mine
KEVIN RYMAN	1x Standard Sidearm, 2x Combat Knife, 7x Ammo x10
LEON S. KENNEDY	1x Power of the t-Virus, 2x Standard Sidearm, 1x Returned Favor, 6x Ammo x10
MARK WILKINS	7x Ammo x10, 1x Submission, 2x Stun Rod
HUNK	7x Ammo x10, 1x Pump-Action Shotgun, 2x Grenade
REBECCA CHAMBERS	1x By Any Means Necessary, 2x Green Herb, 7x Ammo x10

STEP 4: HAVE SOMETHING READY TO KEEP TRACK OF TURNS!

Have game counters of some kind or paper and a pen ready to keep track of the remaining turns of the game.

(A) GAME END & VICTORY CONDITION

After all turns have been depleted, or all Team members have been defeated, the Team with the most Decorations is declared the winner. If Teams are tied in Decorations, then the Team with the Character who has the most Health at the time the game ended is the winner. **The game will start with 15 turns, but more time can be added with the "Time Bonus" cards drawn from the Mansion.**

(B) GAME FLOW

Mercenary Mode is played in Teams. Every Player can either be on a Team by themselves (1 vs. 1 vs. 1 vs. 1, known as free for all), Teams of 2 (2 vs. 2 max) or, if one Player is more experienced than the others, 1 vs. 3.

MERCENARY MODE follows all the rules of STORY MODE, except that when an Infected is Defeated, it begins or continues a Combo Pile that the Team has started. (See the next section for "Combos").

Each game starts with 15 turns. Every time each Team has had a turn, a turn is subtracted from the remaining turns. There are ways of adding more. By adding more time, you can increase your score dramatically by extending your combo. It's up to you and your Team to decide how you want to play.

(C) OTHER RULES TO REMEMBER

Combos

A combo is a string of Defeated Infected that a Team has created as their Characters Explore the Mansion. When Exploring, follow the Instructions under "EXPLORING THE MANSION" in the STORY MODE section. (See Pg 14) In order to keep a Combo going, the Team must Defeat an Infected every turn in succession. For every Infected the Team Defeats, more Decorations can be earned.

When an Infected is Defeated, it is moved into the Team's Combo Pile. If, at the end of the Team's turn, they have a Combo Pile and did not Defeat any Infected that turn, the Decorations are determined and are written down and added to their total.

To determine the total Decorations in the Combo Pile, add up the printed Decoration amount on each Infected card ("Zombie(Male)", for instance, is worth 1) in the Combo Pile, then multiply that amount by the number of cards in the Combo Pile. After determining the total, write down the total Decorations your Team just earned, and move all of the cards in your Combo Pile to the bottom of the Mansion in any order your Team wishes. Note that the "Combo Bonus" card is not worth any Decorations on its own.

Here is the Blue Team's Combo Pile:

Failing to Defeat an Infected this turn, they start to total their Decorations up, with Zombie (Male) being worth 1 Decoration, Kipepeo worth 1, and the Licker β worth 3. This totals up to 5, but is then multiplied by the total number of cards in Blue Teams Combo pile, which was 3, giving them a total of 15 Decorations for this Combo

Leveling Up

Unlike the STORY MODE, Character's Levels are determined by how many Decorations the Team currently has. In other words, the Team members share the Decorations they earn.

Penalty for Losing all your Character's Health

When a Character's Health is reduced to 0 or lower in MERCENARY MODE, that Player is eliminated from the game. If the Health of all the Character's in a Team is reduced to 0 or less, that Team loses the game. **A Character will NOT return as an Infected if their Maximum Infection Level is met or exceeded.**

(GAME MODE 3) VERSUS MODE

PLAYERS NEEDED: 2 TO 4 PLAYERS
ESTIMATED PLAY TIME: 45 MIN TO 1 HOUR

You have successfully escaped the Mansion, along with all of the other survivors. Suddenly, one pulls a gun on the other, and so on, until a great standoff ensues. In order to stay alive, you must defeat your fellow survivors!

STEP 1: PICK A SCENARIO!

Choose 1 of the Scenarios from OUTBREAK MODE or MERCENARY MODE to be used for VERSUS MODE.

STEP 2: TAKE OUT THE MANSION FROM THE FIELD!

This game mode doesn't need the Mansion since Characters are now Battling each other instead. So, remove it from the game.

STEP 3: HAVE THE STARTING INVENTORY AND HAND READY!

Each Player takes the following cards from the Resource Area. Leave the remainder in the Resource Area, if there is any:

7 x Ammo x10 cards | 1 x Handgun | 2 x Combat Knife

Each Player shuffles these 10 cards together and places the pile face down in front of them. These cards are referred to as their Inventory. Then, each Player draws 5 cards from the top of their Inventory as their starting Hand.

You can also start with the Custom Starting Inventory made specifically for each Character, or you can mix and match custom setups. These Custom Starting Inventory setups can be found under MERCENARY MODE.(See Pg 24)

(A)VICTORY CONDITION
When a Character has Defeated another Character, they gain 1 Decoration. When a Character has earned 3 Decorations, the game ends and that Character's controlling Player is declared Victorious.

(B) GAME FLOW
When your Character Explores, instead of Revealing the top card of the Mansion, designate a Character. You are now battling that Character. Follow all rules detailed in the "Exploring the Mansion" section (Pg 14), as if you had Revealed an Infected.

When a Character's Health is reduced to 0 or less, the Attacking Character's controlling Player can choose a Weapon from the Defeated Player's Inventory, Player Area, Hand, or Discard Pile and add it to their Discard Pile. The Defeated Player then shuffles all the cards in their Hand and Discard Pile into their Inventory and draws a new Hand of 5, and turns their Character face down. A Character flipped face down cannot be Attacked. On the Defeated Player's next turn, that Player can only flip up their Character and pass their turn.

Ex. Johnny chooses to Attack Bob's Character and does the right amount of Damage to reduce its Health to 0. Bob glumly flips his Character face down while Johnny looks through Bob's Inventory, Player Area, Hand and Discard Pile and decides to take his "Handgun"card and adds it to his Discard Pile. Bob shuffles all the cards in his Hand, Player Area, and Discard Pile together, draws a fresh Hand of 5, and turns his Character face up during his next turn.

LEVELING UP IN VERSUS MODE
Unlike the other two game modes, **only a single Decoration is needed to gain a Level in VERSUS MODE. If a Character has 2 Decorations, they are Level 2.**

EXTRA EXPLORES
If a Character has more than 1 Explore, they can Attack multiple Characters by using Weapons against different Characters. Designate the Characters you wish to Attack and Reveal your Weapon cards, selecting which Character each Weapon is being used on. Each Weapon can only be used once, unless stated otherwise.

Chapter VII. Terminology of the Game

There are some special terms used in this game. Learn them well and play correctly.

GAIN: Moving a card from Resource Area, Mansion Area, or from outside the game into a Player's Discard Pile.

ATTACH: Taking a card and placing it under your Character or Partner.

REVEAL: Show the indicated card to all Players.

TRASH: Moving a card to the bottom of its Resource Pile in the original Resource Area.

Terminology of the Game (Cont.)

HEAL: Increasing the Health of the Character by indicated amount. However, it cannot exceed its Maximum Health.

REMOVE FROM THE GAME: Move the card out of the game. It is no longer in the current game.

EXPLORE: Following the procedures designated on pgs 14-15.

DEFEAT: When your Damage is higher than the Health of the Revealed Infected.

PERMANENTLY DEFEATED: When a Characters Maximum Health is reduced to 0 or less.

+X CARD(S): As soon as the Player plays a card stating this, Draw X cards from their Inventory. If there are not enough cards in the Player's Inventory, that Player draws as many as they can, shuffles their Discard Pile, places the shuffled cards in their Inventory Area, then draws the rest. If the Player still does not have enough cards, then they draw as many as they can.

+X EXPLORE: The Player may Explore X times more during this turn.

+X ACTION(S): The Player gets X additional Actions during this turn. The instructions on the current Action card must be completed before the Player can play another Action card or moves on to an additional step.

+X BUY(S): The Player may Buy an additional X Resources during their turn. The extra Buy adds to the Players overall Buying amount and does not require a Player to immediately Buy.

+X GOLD: The Player has an additional X Gold for the turn to Buy Resources with.

+X AMMO: The Player has an additional X Ammo for the turn to use Weapons with.

INFECTED CHARACTER: These Character cards will say "Infected Character" at the top.

INFECTION LEVEL: An amount that shows how Infected a Character is. This is represented by a face up pile of Infection cards near the Character.

ATTACK: A Player using 1 Explore to have their Character deal Damage to another Character.

Chapter VIII. FAQ

Q: If an Infected Character Attacks another Character, and raises their Infection Level to 9, then I use the Infector's effect (Ch-032) to raise it by an additional 1, who is considered to have "turned" the Character into an Infected?

A: The Infector will be considered to have turned the Character due to its effect providing the extra 1 Infection needed.

You can find the latest information, upcoming events, updated rules, errata at our official web site:

Box Layout & Game Content

Remove all of the cards from their wrappings and separate them into their individual cards. Then, remove the dividers from their wrappings, and note what they say. It is suggested that you put your cards after the divider in alphabetical order after every game you play, that way it is easier to find the card you are looking for when you play again.

Card no.	Card name	Total amount
CH-021	Excella Gionne	1
CH-022	Kevin Ryman	1
CH-023	David King	1
CH-024	Mark Wilkins	1
CH-025	Jill Valentine	1
CH-026	Leon S. Kennedy	1
CH-027	Ada Wong	1
CH-028	Chris Redfield	1
CH-029	Rebecca Chambers	1
CH-030	Hunk	1
CH-031	Zombie A	1
CH-032	Zombie B	1
CH-033	Zombie C	1
WE-026 & WE-027	Standard Sidearm & Samurai Edge	4 & 1
