SPEED MINI-GAME

No actions, no buys, no taking turns! Just ammo, guns and zombies! Two players, estimated time: 2 to 5 minutes. Require counters of any kind. These can be any type of coin, token, or a distinguishable card.

The following cards will form the Mansion for this mini-game:

Big Man Majini [2]	Los Illuminados (Bow) [3]	Town Majini [3]
Los Ganados (Female) [3]	Los Illuminados (Shield) [1]	Venomous Snake [3]
Los Ganados (Handscythe) [3]	Town Majini (Shovel) [2]	

Shuffle these 20 cards together, then create two separate Mansions with 10 cards each, then place them face down in the middle of the table, with space in between them.

Each Player needs the following cards for their starting Inventory:

AMMO:	WEAPONS:
5x Ammo x10	2x Custom Full-Bore Machine Gun
4x Ammo x20	1x Custom Lightning Hawk
2x Ammo x30	2x Custom Pump-Action Shotgun
	4x Custom Standard Sidearm

Each Player will take their 20 cards and shuffle them together, then place them in their Inventory Area.

Victory Condition
When a Player plays every card in their Inventory and Hand, the game is over. Each Infected they Defeated throughout the game is worth 1 Decoration for every 10 Health that Infected has. Every "Reload Counter" is worth -1 Decoration, and every card in your Hand and Inventory at the end of the game is worth -1 Decoration. The Player with the most Decorations at the end of the game wins!

Game Flow
Each Player will draw 5 cards from the top of their Inventory. In this minigame, Players will perform their turns simultaneously. If at any time, a Player has a Hand of Ammunition or Weapons only, that Player can reveal their hand and take a "mulligan" (shuffle all of their cards in their Hand and Discard Pile into their Inventory, then draw a new Hand of 5 cards). When both Players are ready, they will each flip over the top card of each of the Mansions. Players will ignore all effects for this Game Mode.

Defeating the Infected
In order to Defeat the Infected, a Player needs to play the Ammunition cards required to use the Weapons in their Hand to Defeat 1 of the Revealed Infected (Players can "overpay" and play too much Ammunition if they wish). As soon as a Player has done this, they can take that Infected from the middle of the table and move it to the side of their Play Area. Afterwards, turn over the next Infected in the same Mansion, then that Player draws cards from their Inventory until they have 5 cards in their Hand.

When a Player is using 1 Weapon, their Damage may exceed the Health of the Infected. However, a Player may not play a 2nd Weapon unless it is required to Defeat that Infected.

If at any time, a Player cannot play any Weapons due to insufficient ammo, they Gain 1 "Reload Counter". A Reload Counter gives a Player +30 Ammo for their next Weapon. Ammo does not carry over. When you Defeat an Infected, any extra Ammo you have does not carry over, meaning you will have to play Ammunition cards to generate new Ammo.

With multiple ways to play, choosing the best one is the key to victory. (NOTE: This scenario will have 16 Resource Piles instead of the usual 18.)

ADVANCED NOTE 1: Custom Resources

As Players become more experienced, they may wish to try their own combination of Resources. Allow each Player to pick one of the Resource Piles one at a time, until you have 18 Resource piles total. It is advised that you always play with the Basic Resources.

ADVANCED NOTE 2: Alternate Play Difficulty

Use the below if you feel that the above setups are not suitable enough to meet your demands:

Easy Difficulty: All Infected get -10 Health, -10 Damage, and their effects are not active.

Hard Difficulty: All Infected get +10 Health, +10 Damage, and apply their effects twice.

Hard Difficulty (Outbreak): Characters die to the Infection at an Infection Level of 8 instead of 10. They still shuffle 10 Infections into their Inventory when they become an Infected.

Professional Difficulty (Premier): Apply all the Hard Difficulty rules. In addition, if an Infected is not defeated, it remains face up and must be defeated before Players can move on. The face-up Infected must be Attacked by Characters on their turns until it is defeated. When you choose to Attack the Revealed Infected, you use an Explore to do so. You cannot Explore the Mansion until the Revealed Infected is defeated. Characters who are reduced to 0 or less Health in this mode are permanently out of the game and do not revive.

Professional Difficulty (Alliance): Player's must Explore at least once on their turn.

Professional Difficulty (Outbreak): Character's Infection Level increases by 1 at the end of their turn, regardless of whether they Explored or not.

Professional Difficulty (Nightmare/Mercenaries): Hard Difficulty & Players must Explore at least once on their turn.

ADVANCED NOTE 3: Custom Starting Inventories

Players can also play with the Custom Starting Inventories in order to enhance the flavor of the game even more. You can find these Custom Starting Inventories under the MERCENARY MODE section. (pg. 13)

ADVANCED NOTE 4: The Weekend Killer

Feel like Resident Evil action all day long? Combine the Mansions from all Resident Evil sets and rejoice in the Infected hunting fun! The game ends when "Albert Wesker", "Uroboros Aheri", "Tyrant T-002", and "Osmund Saddler" have been defeated.

ADVANCED NOTE 5: Using Outbreak Cards

If you're not playing Outbreak Mode and a card tells you to increase your Infection, Gain 1 "Ammo x10″ card instead. (Suggestion from Bandai forum.)

Card Misprints:

* AC-032 Lonewolf -The "+1 Ammo" icon should be "+20 Ammo".
* AC-034 Raccoon City Police Department - "+2 Ammo" icon should be "+20 Ammo".
* CH-031 Zombie A - The "Berserker" in its effect text should be "Zombie A".
* Card #s: MA-054, MA-055, MA-056 and MA-057 appears on cards in both Outbreak and Nightmare sets.

"Infested Shopping Mall"	Alliance	Mercenary Mode

Terminology of the Game:

These are the special terms used throughout the game.

Attach: Taking a card and placing it under your Character or Partner.

Attack: A Player using 1 Explore to have their Character deal Damage to another Character.

Defeat: When your Damage is greater than or equal to the Health of the Infected.

Explore: Following the procedures designated in the rulebook.

Gain: Moving a card from Resource Area, Mansion Area, or from outside the game into a Player's Discard Pile.

Heal: Increasing the Health of the Character card by indicated amount. However, it cannot exceed its Maximum Health.

Infected Character: These Character cards will say "Infected Character" at the top.

Infection Level: amount that shows how Infected a Character is. This is represented by a face up pile of Infection cards near the Character.

Main Character: Your non-Partner Character

Obtain: a card to your Inventory, Discard Pile, or Hand.

Partner: secondary Character.

Permanently Defeated: a Characters Maximum Health is reduced to 0 or less.

Remove from the Game: Move the card out of the game. It is no in the current game.

Reveal: the indicated card to all Players.

Trash: Moving a card to the bottom of its Resource Pile in the original Area.

+X Action(s): The Player gets X additional Actions during this turn. The instructions on the current Action card must be completed before the Player can play another Action card or moves on to an additional step.

+X Ammo: The Player has an additional X Ammo for the turn to use with.

+X Buy(s): The Player may Buy an additional X Resources during their turn. The extra Buy adds to the Players overall Buying amount and does not require a Player to immediately Buy.

+X Card(s): As soon as the Player plays a card stating this, Draw X cards from your Inventory. If there are not enough cards in the Player's Inventory, that Player draws as many as they can, shuffles their Discard Pile, places the shuffled cards in their Inventory Area, then draws the rest. If the Player still does not have enough cards, then they draw as many as they can.

+X Explore: The Player may Explore X times more during this turn.

+X Gold: The Player has an additional X Gold for the turn to Buy Resources with.
