Terminology of the Game

Prologue

News reports begin to come in, speaking of cannibalism in the remote corners of the United States. Reports indicate that people were attacked by a group of roughly 10 people. The only evidence found were bits of torn flesh and bone. The grisly incidents continue to increase, with the epicenter being triangulated to an isolated mansion just outside the city limits.

Upon approaching the Mansion, however, you come under attack. Your aggressors seem unfazed by your attacks, and you retreat into the mansion. Unable to go back the way you came, will you be able to forge ahead, find a way out and, most of all, escape with your life? Welcome to the Survival Horror....

Chapter I. Game Concept

Welcome to the Resident Evil™ Deck Building Game. This is a game where you build up a deck from meager beginnings. The deck you build represents your Inventory, whether that includes Medical Supplies, Weapons, or Ammunition. Your deck will be your lifeline to survival.

Chapter II. Card Analysis

(1) CHARACTER CARD

Character cards are used to battle against the Infected you encounter throughout the game. Each Character has special effects that could change the game when used.

All Characters have a base damage of 0. (See pg 12 for new Base Damage Rule)

- Ⓐ Card Type
- Ⓑ Starting and Maximum Health: This shows the starting Health of this Character. This also represents the starting Maximum Health of this Character.
- Ⓒ Character Name
- Ⓓ Levels & Decoration Requirements: This shows the Decorations required to be the Level indicated. (See Pg 15 for Level Up and Decorations)
- Ⓔ Effects: These are the special effects of this Character. Character effects which use the word “can” in them can only be used once during their noted timing. So use them carefully!

(2) AMMUNITION CARD

Ammunition serves as the Basic Resource Players need to use their Weapons and to gain Gold to Buy other Resources.

- Ⓐ Card Type
- Ⓑ Cost to Buy
- Ⓒ Name
- Ⓓ Bonus Icons: These show any additional bonuses the Ammunition gives. In the example, this Ammunition gives +10 Ammo and +10 Gold.

(3) WEAPON CARD

Weapon cards are used in battle to deal Damage to the Infected. Most Weapons have an Ammo Requirement that you need to fulfill in order to deal Damage. Weapons will be your primary Resource used to deal Damage to the Infected.

- Ⓐ Card Type
- Ⓑ Cost to Buy
- Ⓒ Weapon Name
- Ⓓ Weapon Type
- Ⓔ Ammo Requirement: This shows how much Ammo is needed to use the Weapon.
- Ⓕ Damage: This shows how much Damage this Weapon deals when used.
- Ⓖ Weapon Effect: The special effect the Weapon provides, if any. Weapon effects are activated when the Weapon is used.

(4) INFECTED CARD

Infected cards are only in the Mansion (See Pg 07 for Mansion). As Players Explore the Mansion, they have a high chance of encountering the Infected. When they do, they must Battle and defeat them using whatever Weapon cards they have, lest they be permanently incapacitated.

- Ⓐ Card Type
- Ⓔ Infected Name
- Ⓒ Health
- Ⓓ Effect: This shows the special effects this Infected has, if any.
- Ⓑ Damage: This shows how much Damage it deals to the Exploring Character if it is not Defeated in battle.
- Ⓕ Decoration Reward: This shows how many Decorations the Infected provides once Defeated. The stronger the Infected is, the more Decorations your Character earns.

Chapter II. Card Analysis (cont.)

(5) ITEM CARD
Item cards have useful effects like healing or increasing the Maximum Health of Characters. Certain Items can only be found in the Mansion. Use them correctly to achieve an advantage over other Players.

- Ⓐ Card Type
- Ⓑ Cost to Buy
- Ⓒ Item Name
- Ⓓ Effect: The special effect it gives to the Player.

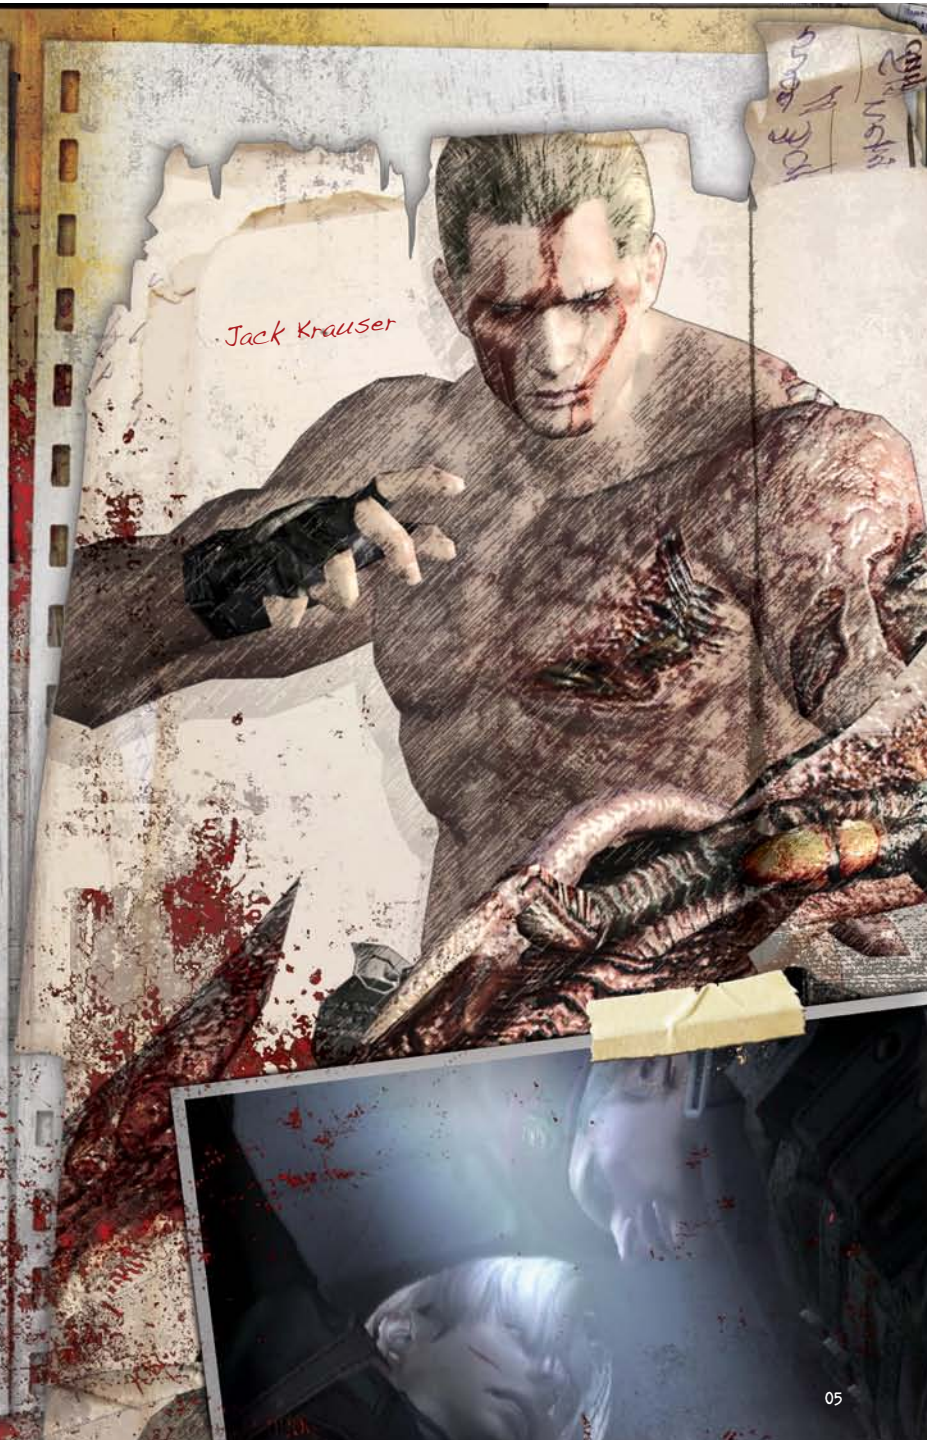

(6) ACTION CARD
Action cards have powerful effects that provide bonuses that Players will need in their quest to defeat the Infected.

- Ⓐ Card Type
- Ⓑ Cost to Buy
- Ⓒ Action Name
- Ⓓ Effect: The special effect it gives to the Player.
- Ⓔ Bonus Icons: The extra bonuses you are getting during the turn the card is played. Apply these Bonus Icons before applying the effect.

(7) EVENT CARD
Event cards represent special occurrences or findings that you will encounter while Exploring the Mansion.

- Ⓐ Card Type
- Ⓑ Event Name
- Ⓒ Effect: The special effect that occurs when the card is Revealed.

Chapter III. Things you need to play

o 1-4 Players

o Game counters (dice, loose change, etc) or a pen and paper to keep track of the Health of the Characters.

Chapter IV. Field Layout

The area in the center is referred to as the Resource Area Ⓐ and 18 different card piles (known as Resource Piles) are placed here, face up. All the cards in this area are referred to as Resources in the game. Players can Buy these cards by paying their cost. For example, the cost of the "Green Herb" is 20.

Depending on which Scenario you play, different Resources are placed in the Resource Area. (See Pg. 19 for Scenarios) However, there are certain cards you need in every game. The following cards are the **[Basic Resources]** and are placed in the Resource Area for every game. The Basic Resources are:

BASIC RESOURCE PILES:

(1) "Ammo X 10"
(2) "Ammo X 20"
(3) "Ammo X 30"
(4) "Green Herb"
(5) "Handgun" & "Burst-Fire Handgun"*
(6) "Combat Knife" & "Survival Knife"*

*Combine and shuffle them into a pile

Basic Resources

*As you can see, piles (5) and (6) have 2 different kinds of cards in them. All of the noted cards should be shuffled into the same pile before placing them in the Resource Area.

Each Player has their own Play Area Ⓑ, Discard Pile Ⓒ and Inventory Area Ⓓ. Whenever a Player plays a card from their Hand, it is placed in their Play Area face up. At the end of each Player's turn, the Player discards all the cards they played that turn, and the ones in their Hand to their Discard Pile. Whenever a Player Buys or Gains a card, it is also moved to their Discard Pile right away.

Another area called the Mansion Area Ⓔ is added next to the Resource Area. The Mansion includes powerful Weapons, Items, and various Events, along with the vicious Infected. Shuffle the following cards into a pile and place it next to the Resource Area, keeping it face down.

Chapter V. Basic Game Setup

(1) DECIDE WHO GOES FIRST!

Randomly determine the first Player. If playing multiple games in a row, randomly determine the starting Player from all Players that lost the previous game. Play continues clockwise from the Player who went first.

(2) PICK A CHARACTER!

Randomly deal out 2 Character cards to each Player. Each Player chooses 1 of these Characters to play as and removes the other Character card from the game.

Chapter VI. Game Modes

(GAME MODE 1) STORY MODE

PLAYERS NEEDED: 1 TO 4 PLAYERS
ESTIMATED PLAY TIME: 45 MIN TO 1 HOUR

A deadly Virus is causing the recently deceased to arise again in a suburb. Moving under the cover of night, you attempted to infiltrate the epicenter, an old, decrepit mansion. However, monstrous animals and abominations, created by the virus, infecting living beings, gave chase.

Fleeing to the mansion, you are now forced to find an exit through other ways. Will you bravely step forward into the abyss and find a way out, or will you fall victim to one of the Infected?

STEP 1: SET UP THE "NIGHTMARE" OR THE "BIOHAZARD" SCENARIO!

Story Mode is meant to be played with any combination of cards. You can play with as few as 18 Resource Piles, or as many as you want. For the first time you play, start with the "Nightmare" Scenario if you own "Resident Evil™: The Deckbuilding Game" or "Biohazard" if you own "Resident Evil™: Alliance":

"NIGHTMARE" RESOURCES (RE:DBG BASE SET AND NIGHTMARE):

- o [Basic Resources]
- o Single Shot Rifle w/ Scope & Special Ops Rifle*
- o Lonewolf
- o A Gift?
- o High Value Targets
- o Broken Butterfly
- o Long Awaited Dawn
- o HE Grenade
- o PDA
- o Toe to Toe
- o Ominous Battle
- o Escape From The Dead City
- o Machine Pistol w/ Stock & Gangster's Machine Gun*

**Combine and shuffle them into a pile.*

"BIOHAZARD" RESOURCES (RE:ALLIANCE AND NIGHTMARE):

- o [Basic Resources]
- o Fierce Battle
- o Toe to Toe
- o Desperate Escape
- o PDA
- o Broken Butterfly
- o A Gift?
- o Symbol of Evil
- o Raccoon City Police Department
- o Riot Shotgun & Triple Barreled Shotgun*
- o Single Shot Rifle w/ Scope & Special Ops Rifle*
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o High Value Target

**Combine and shuffle them into a pile.*

Take all of the Resource Piles from the Scenario you chose and add them to the Resource Area.

STEP 2: HAVE THE STARTING INVENTORY AND HAND READY!

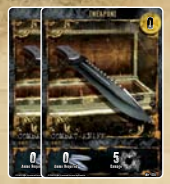

Each Player takes the following cards from the Resource Area. Leave the remainder in the Resource Area, if there is any:

7 x Ammo x10 cards

1 x Handgun

2 x Combat Knife

Each Player shuffles these 10 cards together and places the pile face down in front of them. These cards are referred to as their Inventory. Then, each Player draws 5 cards from the top of their Inventory as their starting Hand.

(A) GAME END AND VICTORY CONDITION: EARN THE MOST DECORATIONS BEFORE "OSMUND SADDLER" IS DEFEATED!

The game ends as soon as a Character Defeats the most powerful Infected in the Mansion. In this expansion, the most powerful Infected is “Osmund Saddler”.

Once “Osmund Saddler” has been Defeated, each Player will total up their Decorations. **The Player with the most total Decorations of all the Infected they have Defeated is the winner.** If Players’ are tied for most Decorations, then the Player with the most Health at the moment the game ended is declared the winner. If they are tied, then all (both) of them are the winners.

Osmund Saddler

If every Player's Character is Permanently Defeated, the game ends, and all Players total up their Decorations to determine the winner as if "Osmund Saddler" had been Defeated.

((B) GAME FLOW: 1 ACTION, 1 BUY, 1 EXPLORE, DISCARD EVERYTHING AND DRAW 5 AT THE END!

Each Player begins their turn with the following:

o 1 ACTION o 1 BUY o 1 EXPLORE

The Player may do any of the following 5 options in any order they wish:

(1) Play an Action(s)

(2) Play an Item(s) and/or Ammunition(s)

(3) Activate a Character’s Effect(s)

(4) Explore the Mansion

(5) Buy a Resource (s)

*You do NOT have to perform any of these if you do not want to.

ACTION CARD

1) PLAYING ACTION(S)

Each Player begins their turn with 1 Action. Playing an Action card uses 1 Action, but some cards allow a Player to get more Actions during their turn, allowing for more Actions to be played in a single turn.

To play an Action, place the card from your Hand face up in your Play Area, then apply the Bonus Icons on the bottom of the card first, then the written effect(s), if any.

A Player must finish all effects of the current Action before another card can be played. If a Player cannot perform all of the listed effects, then the Player does as much as they can. Any Action played remains in the Player’s Play Area until the end of their turn.

*Some Actions provide additional Ammo, Gold, Buys or Actions. Don’t forget to add these amounts in prior to Exploring or Buying for your turn.

ITEM CARD

(2) PLAYING ITEM(S) & AMMUNITION

To play an Item, place the card from your Hand face up in your Play Area, then do any effects that are listed on the Item. If a Player cannot perform all of the listed effects, then the Player does as much as they can. When you play Ammunition, apply the bonus effects first, then the written effects (if any). Remember that Gold and Ammo are a total that disappears at the end of the turn, so using all of your Ammunition is usually a good idea.

Any Items and Ammunition played remains in that player’s Play Area until the end of the turn. You can play as many Items and Ammunition as you want to during your turn.

CHARACTER CARD

(3) ACTIVATING A CHARACTER'S EFFECT(S)

To activate a Character's effect, the timing needs to be correct. If it is, you can activate it. There are some permanent effects that are active as long as you are meeting certain conditions. For the timing of the effects, read each effect carefully to determine when you can activate them.

A Character's effect with the word "can" in it may only be activated once during its noted timing per turn.

If, at any time, a non-Infected card effect and an Infected card effect have the same timing, the Infected effect must be applied first.

All Characters & Infected Characters have a base Damage of 0 if not shown otherwise. Some Characters in Resident Evil™ have the ability to increase their Damage, turning their own typically non-lethal bodies into Infected slaying machines!

Colmillos

Verdugo

(4) EXPLORING THE MANSION

When a Character Explores the Mansion, do the following:

1) Announce that you are Exploring.

2) Play and declare any Weapons your Character will be using.

Each Weapon can only be used once, unless stated otherwise.

3) Meet the Ammo Requirement on the Weapons being used. Add up your Ammo from all of the cards in your Play Area and assign any amount of that Ammo to each Weapon being used.

4) Total up the amount of Damage that your Character is dealing by adding up your Weapon's Damage, Character's Damage, and any effects provided by other cards.

5) If any Weapons being used have any effects, they must be used at this moment.

Example

James declares that he is going to Explore the Mansion. He plays a Combat Knife and a Handgun, and notes the 20 Ammo he received from Ammo x20, giving James' Character a total of 15 Damage.

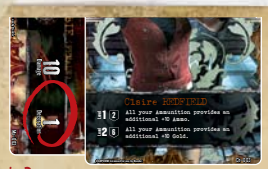

After performing the above, Reveal the top card of the Mansion. If an Infected is Revealed, note any effect on the card. If it has an effect, apply it when the effect says so. (See Example A.)

If the Character's total Damage meets or exceeds the Infected's Health, then the Infected is Defeated. The Infected itself is attached to the Player's Character, and its Decoration Reward value is added to that Character's total. (See Example B.)

Example A

James Reveals the top card of the Mansion, which turns out to be a Zombie (Female).

Example B

James' 15 Damage equals the 15 Health on the Zombie (Female), and he attaches the Infected to his Character, adding its Decorations to his total. The Zombie (Female) also allows James to select another Player and deny that Player the ability to play Actions during their next turn.

LEVEL UP!

When a Character has obtained a certain amount (or more) of the indicated Decorations, that Character "levels up", giving you access to more powerful effects to aid you in your escape. **When a Character becomes Level 2, that Character has all of the effects of Level 1 as well as Level 2.**

Should a Character fail to Defeat the Revealed Infected, the Infected lashes out and damages the Character, dealing the indicated Damage amount (plus any modifiers) to the Character. The Revealed Infected is moved to the bottom of the Mansion afterwards. Note that some Infected have effects when they are NOT Defeated. Be sure to apply these effects before you deal the Infected's Damage.

Example

Instead of a Zombie (Female), James runs into the Hunter. James' 15 Damage is not enough to beat the Hunter. He applies the Hunter's effect, which forces James to randomly Trash 2 cards from his Discard Pile, takes 30 Damage, then moves the Hunter to the bottom of the Mansion.

PENALTY FOR LOSING ALL YOUR CHARACTER'S HEALTH

If your Character's Health is reduced to 0 or less, then that Character has been fatally injured in their conquest. Turn the Character face down and shuffle together all the cards in your Hand, Player Area and Discard Pile into your Inventory. Then, place your Inventory face down in front of you. All cards currently attached to your Character remain attached to your Character. A face down Character is considered to not exist, and neither does their Player, meaning that neither can be targeted by effects.

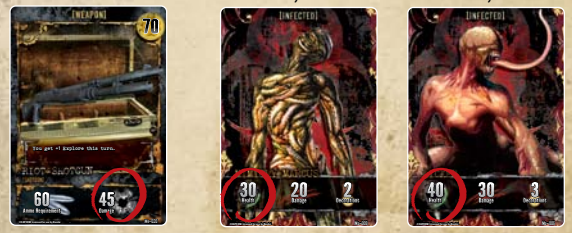

When your turn comes around, flip your Character face up. **Reduce the maximum Health of your Character by 20**, Heal your Character to your new maximum Health amount, draw 5 new cards from your Inventory, and end your turn. During this process, your Infection Level does not increase. If your Character's Maximum Health is 0 or less at this point, your Character is Permanently Defeated and your game is over. Keep all cards you have Gained throughout the game in front of you until the game is over.

EXTRA EXPLORE

Some Weapons, like Shotguns, allow a Character to Explore multiple times in a turn. If a Player has multiple Explores, they can use 1 Explore at a time, or all at once. If multiple Infected are Revealed all at once, the Player's total Damage must exceed or equal the Revealed Infected's combined Health.

If it does not, then the Character receives the total Damage of all the Revealed Infected. Afterwards, all Revealed Infected that were not Defeated are moved to the bottom of the Mansion in a random order.

Example

Tylar has 60 Ammo and his Character is using a Riot Shotgun which deals 45 Damage. He uses 1 Explore and Reveals Mimicry Marcus, which has 30 Health. He decides to use his 2nd Explore and Reveals Licker, which has 40 Health. Since their total Health is greater than Tylar's Character's 45 Damage, both Infected deal 50 Damage to Tylar's Character (30 from the Licker & 20 from Mimicry Marcus).

Players can also choose to Explore 1 at a time. While this way is much safer, you also require more weaponry, since Weapons apply their whole Damage only on the Explore when they are used and can only be used once per turn. When doing this, repeat all steps under EXPLORING THE MANSION (Pg. 14) for each single instance of Exploring.

Example

Alex has 40 Ammo and is using a Shotgun which deals 25 Damage. He uses his first Explore and Reveals a Kipepeo, which has 20 Health. Alex decides to stop, and adds the Kipepeo to his Decorations. Later in the turn, Alex decides to use his 2nd Explore, playing 2 Knives and a Handgun, for a total of 20 Damage. Alex Reveals the Zombie (Male), which has 20 Health. Alex defeats the Zombie (Male) and also adds it to his Decorations.

NON-INFECTED CARDS

Sometimes Events, Weapons, or Items can be found when Exploring the Mansion instead of an Infected. In this case, when the non-Infected card is Revealed, perform the effect(s) listed on the card.

(6) BUYING RESOURCES

When Buying, a Player can spend their Gold gained for the turn to Buy Resources in order to aid them in upcoming battles. The cost of each card is located in the upper right hand corner.

When a Player Buys a card, they move that card from the Resource Area into their Discard Pile. When a Resource Pile is empty, Players cannot Buy any more of that Resource.

If the Player has multiple Buys, they combine the total amount of Gold they have for the turn before Buying. This total amount is used to pay for everything they Buy this turn. Buys are done one at a time. Here is an example of Buying Resources during a turn.

Example

After playing his Ammunition and Action, Andy has a total of 50 Gold to Buy with and 2 Buys this turn. Andy chooses to first Buy the Handgun:

After moving the Handgun to his Discard Pile, the next card in the Pistol Resource Pile is revealed to be the powerful Burst-fire Handgun. Seeing that the Burst-fire Handgun costs 60 Gold to Buy, Andy finds himself too low on Gold to Buy it. Instead, Andy chooses to use his 2nd Buy to Buy a Green Herb:

(7) END OF TURN PROCEDURE

At the end of a Player's turn, the Player must Discard all cards in their Play Area that aren't attached to their Character(s) and all remaining cards in their Hand. Then draw 5 new cards. Once a Player has completed drawing a new Hand of 5, play is passed to the Player to the left.

*Any time a Player needs to draw cards but cannot because of an insufficient amount of cards in their Inventory, they draw as many as they can, shuffle their Discard Pile, then place it in their Inventory Area face down, and draw the rest.

(8) ADDITIONAL STORY MODE OPTIONS

Resident Evil™: The Deck Building Game with Nightmare

Use the following Scenarios if you have the Resident Evil™: The Deck Building Game along with Resident Evil™: Nightmare.

"BIGGER IS BETTER" RESOURCES:

- o [Basic Resources]
- o Ecape From the Dead City
- o Longbow
- o Toe to Toe
- o High Value Targets
- o Ominous Battle
- o Lonewolf
- o The Merchant
- o Broken Butterfly
- o Deadly Aim
- o Shattered Memories
- o Bolt-Action Rifle & Semi-Automatic Rifle*
- o Pump-Action Shotgun & Automatic Shotgun*

Combine and shuffle them into a pile.

Having a Bigger Inventory allows a player more options, and greater power...

"SURGING FORWARD" RESOURCES:

- o [Basic Resources]
- o Raccoon City Police Department
- o Toe to Toe
- o Reload
- o Deadly Aim
- o Shattered Memories
- o Mind Control
- o Broken Butterfly
- o Silver Ghost & Punisher*
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o Longbow
- o Pump-Action Shotgun & Automatic Shotgun*
- o Single Shot Rifle w/ Scope & Special Ops Rifle*

Combine and shuffle them into a pile.

Will you rush through the Mansion, or take your time gathering everything?

"AMBITION" RESOURCES:

- o [Basic Resources]
- o Vengeful Intention
- o PDA
- o Mind Control
- o Six Shooter
- o Ominous Battle
- o A Gift?
- o Deadly Aim
- o Symbol of Evil
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o Mine Thrower
- o Pump-Action Shotgun & Automatic Shotgun*
- o Single Shot Rifle w/ Scope & Special Ops Rifle*

Combine and shuffle them into a pile.

You only have 1 goal: Complete. Global. Saturation. And you intend to meet it.

Resident Evil™: Alliance with Nightmare

Use the following Scenarios if you have Resident Evil™: Alliance along with Resident Evil™: Nightmare.

"LOADED FOR BEAR" RESOURCES:

- o [Basic Resources]
- o Treasure
- o Mine Thrower
- o Quirk of Fate
- o Fierce Battle
- o Great Ambition
- o HE Grenade
- o Gathering Forces
- o Broken Butterfly
- o Flamethrower
- o Riot Shotgun & Triple Barreled Shotgun*
- o Single Shot Rifle w/ Scope & Special Ops Rifle*
- o Silver Ghost & Punisher*

Combine and shuffle them into a pile.

Itching for a fight? Make sure to go in with an ample supply of Weaponry!

"GRIEFING" RESOURCES:

- o [Basic Resources]
- o Uroboros Injection
- o Quirk of Fate
- o Flashbang
- o Mine Thrower
- o A Gift?
- o Mind Control
- o Broken Butterfly
- o Toe to Toe
- o Long Awaited Dawn
- o Single Shot Rifle w/ Scope & Special Ops Rifle*
- o Silver Ghost & Punisher*
- o Riot Shotgun & Triple Barreled Shotgun*

**Combine and shuffle them into a pile.*

Hold back the other players from winning, and you may find yourself in the lead...

"HOARDING" RESOURCES:

- o [Basic Resources]
- o High Value Targets
- o Incendiary Grenade
- o Toe to Toe
- o Vengeful Intention
- o Fierce Battle
- o Mine Thrower
- o Lonewolf
- o Raccoon City Police Department
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o Silver Ghost & Punisher*
- o Riot Shotgun & Triple Barreled Shotgun*
- o Telescopic Sight Rifle

**Combine and shuffle them into a pile.*

No Trash is the centerpiece of this Scenario.

ADVANCED NOTE 1: CUSTOM RESOURCES

As Players become more experienced, they may wish to try their own combination of Resources. Allow each Player to pick one of the Resource Piles one at a time, until you have 18 Resource piles total. It is advised that you always play with the Basic Resources.

ADVANCED NOTE 2: ALTERNATE PLAY DIFFICULTY

Use the below if you feel that the above setups are not suitable enough to meet your demands:

Easy Difficulty: All Infected get -10 Health, -10 Damage, and their effects are not active.

Hard Difficulty: All Infected get +10 Health, +10 Damage, and apply their effects twice.

Professional Difficulty: Hard Difficulty & Player's must Explore at least once on their turn.

ADVANCED NOTE 3: CUSTOM STARTING INVENTORIES

Players can also play with the Custom Starting Inventories in order to enhance the flavor of the game even more. You can find these Custom Starting Inventories under the MERCENARY MODE section. (pg. 24)

ADVANCED NOTE 4: RESIDENT EVIL™ EXPANDED

Own every expansion of the Resident Evil™: Deck Building Game? Try out these Scenarios for a more diverse gaming experience!

"DISPOSABLE" RESOURCES:

- o [Basic Resources]
- o HE Grenade
- o Ominous Battle
- o The Merchant
- o Incendiary Grenade
- o Treasure
- o Flashbang
- o Fierce Battle
- o Desperate Escape
- o Raccoon City Police Department
- o Shattered Memories
- o Night Scope Rocket Launcher
- o Lightning Hawk & Hand Cannon*

**Combine and shuffle them into a pile.*

One and done is the easiest way to sum up this odd Scenario.

"MILLIONAIRE" RESOURCES:

- o [Basic Resources]
- o Treasure
- o Item Management
- o Shattered Memories
- o The Merchant
- o Gathering Forces
- o High Value Targets
- o Mine Thrower
- o Toe to Toe
- o Flamethrower
- o Fierce Battle
- o Lightning Hawk & Hand Cannon*
- o Riot Shotgun & Triple Barreled Shotgun*

**Combine and shuffle them into a pile.*

You'll feel like a million bucks when everything is within your grasp.

"COMPETITIVE" RESOURCES:

- o [Basic Resources]
- o Night Scope Rocket Launcher
- o Mine Thrower
- o Broken Butterfly
- o Shattered Memories
- o Parting Ways
- o Gathering Forces
- o Deadly Aim
- o Fierce Battle
- o Injection
- o Stun Rod
- o Silver Ghost & Punisher*
- o The Merchant

**Combine and shuffle them into a pile.*

There is no one way to win with this Scenario.

ADVANCED NOTE 5: THE WEEKEND KILLER

Feel like Resident Evil™ action all day long? Combine the Mansions from all Resident Evil sets and rejoice in the Infected hunting fun! The game ends when "Albert Wesker", "Uroboros Aheri", "Tyrant T-002", and "Osmund Saddler" have been defeated.

(GAME MODE 2) MERCENARY MODE

PLAYERS NEEDED: 2 TO 4 PLAYERS
ESTIMATED PLAY TIME: 30 MIN TO 45 MIN

You and your Team have been dropped into the middle of a huge mob of Infected. Your mission: destroy everything around you in a quick and timely manner. For every Infected Defeated, you have been promised a greater reward for your bravery.

With MERCENARY MODE, a new type of card is introduced, exclusive to this mode. The Bonus cards are only included in "Resident Evil™: The Deck Building Game" & "Resident Evil™: Alliance".

BONUS CARD
Bonus cards are used only in MERCENARY MODE. This card can only be found in the Mansion.

- **A** Card Type
- **B** Card Name
- **C** Effect: When this card is Revealed from the Mansion and the Player decides to Gain it, perform this effect.

STEP 1: PICK A SCENARIO!

Any Scenario from STORY MODE can be used for this game mode, or you can choose from one of the below. All Scenarios below require either "Resident Evil™: The Deck Building Game" or "Resident Evil™: Alliance".

Resident Evil™: The Deck Building Game & Nightmare Mercenary Scenarios:

"SACRIFICE" RESOURCES:

- o [Basic Resources]
- o Shattered Memories
- o Symbol of Evil
- o Ominous Battle
- o A Gift?
- o Vengeful Intention
- o Toe to Toe
- o Grenade
- o Mine Thrower
- o Six Shooter
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o Single Shot Rifle w/ Scope & Special Ops Rifle*
- o Silver Ghost & Punisher*

**Combine and shuffle them into a pile.*

Convert your Health into more beneficial gains, such as cards, ammo, and more. There are multiple ways to establish your teams dominance with this scenario.

"SLUGGISH" RESOURCES:

- o [Basic Resources]
- o Mind Control
- o A Gift?
- o The Merchant
- o Ominous Battle
- o Item Management
- o PDA
- o HE Grenade
- o Silver Ghost & Punisher*
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o Pump-Action Shotgun & Automatic Shotgun*
- o Six Shooter
- o Single Shot Rifle w/ Scope & Special Ops Rifle*

**Combine and shuffle them into a pile.*

Less Actions demands smarter buying and more tactical decisions on your team's part.

"ZOMBIE HUNTERS" RESOURCES:

- o [Basic Resources]
- o Item Management
- o Escape From the Dead City
- o Deadly Aim
- o High Value Targets
- o Shattered Memories
- o Long Awaited Dawn
- o Toe to Toe
- o Mine Thrower
- o Single Shot Rifle w/ Scope & Special Ops Rifle*
- o Pump-Action Shotgun & Automatic Shotgun*
- o Bolt-Action Rifle & Semi-Automatic Rifle*
- o Machine Pistol w/ Stock & Gangster's Machine Gun*

**Combine and shuffle them into a pile.*

The hunted becomes the hunter in this scenario.

Resident Evil™: Alliance & Nightmare Mercenary Scenarios:
Use the following Scenarios if you have the Resident Evil™: Alliance along with Resident Evil™: Nightmare.

"INFESTED POLICE STATION" RESOURCES:

- o [Basic Resources]
- o Fierce Battle
- o PDA
- o Desperate Escape
- o Toe to Toe
- o Raccoon City Police Department
- o Telescopic Sight Rifle
- o Riot Shotgun & Triple Barreled Shotgun*
- o Silver Ghost & Punisher*
- o Long Awaited Dawn
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o Russian Assault Rifle & Signature Special*
- o Single Shot Rifle w/ Scope & Special Ops Rifle*

**Combine and shuffle them into a pile.*

Your team has been dropped into a very familiar building: a police department, which has been completely overrun by the Infected!

"INFESTED GUN SHOP" RESOURCES:

- o [Basic Resources]
- o Machine Pistol w/ Stock & Gangster's Machine Gun*
- o Broken Butterfly
- o HE Grenade
- o Silver Ghost & Punisher*
- o Mine Thrower
- o Quirk of Fate
- o Gathering Forces
- o Great Ambition
- o Single Shot Rifle w/ Scope & Special Ops Rifle*
- o Russian Assault Rifle & Signature Special*
- o Long Awaited Dawn
- o Riot Shotgun & Triple Barreled Shotgun*

**Combine and shuffle them into a pile.*

Walls and cabinets stand in front of you, filled to the brim with every Weapon imagineable, eagerly awaiting use against those who had wronged their owner...

STEP 2: MODIFY THE MANSION!

Remove the following cards from the Mansion of STORY MODE:

- o "Treasure Map" (2 Total)
- o "Hidden Treasure" (2 Total)
- o "P.R.L. 412"
- o "Osmund Saddler"
- o "Bitores Mendez"

Then, add the Bonus cards to the Mansion. Shuffle up the entire Mansion, and place it in the Mansion Area.

STEP 3: PREPARE THE CUSTOM STARTING INVENTORY!

Each Character card has a Custom Starting Inventory that they start with. Custom Inventories are detailed below:

ADA WONG	1x Green Herb, 1x Machine Pistol w/ Stock, 6x Ammo x10 1x Vengeful Intention, 1x Symbol of Evil
ALBERT WESKER	1x Symbol of Evil, 1x Vengeful Intention, 6x Ammo x10 1x Incendiary Grenade, 1x Single Shot Rifle w/ Scope
CARLOS OLIVEIRA	1x Combat Knife, 1x Symbol of Evil, 1x HE Grenade 1x Machine Pistol w/ Stock, 1x Ammo x20, 5x Ammo x10
CHRIS REDFIELD	1x PDA, 1x Long Awaited Dawn, 1x Single Shot Rifle w/ Scope, 1x Silver Ghost, 2x Ammo x20, 3x Ammo x10, 1x Flashbang
JOSH STONE	1x A Gift?, 1x Green Herb, 1x Machine Pistol w/ Stock, 1x HE Grenade, 6x Ammo x10
LEON S. KENNEDY	2x Silver Ghost, 1x Raccoon City Police Department 1x PDA, 6x Ammo x10
LUIS SERA	1x A Gift?, 2x Single Shot Rifle w/ Scope, 7x Ammo x10
MIKHAIL VICTOR	1x Machine Pistol w/ Stock, 1x Raccoon City Police Department, 7x Ammo x10, 1x Silver Ghost
MYSTERIOUS MASK	1x Machine Pistol w/ Stock, 1x HE Grenade, 7x Ammo x10, 1x Raccoon City Police Department
SERGEI VLADIMIR	1x Vengeful Intention, 1x Lonewolf, 6x Ammo x10 2x Single Shot Rifle w/ Scope

STEP 4: HAVE SOMETHING READY TO KEEP TRACK OF TURNS!

Have game counters of some kind or paper and a pen ready to keep track of the remaining turns of the game.

(A) GAME END & VICTORY CONDITION

After all turns have been depleted, or only 1 Team is not Permanently Defeated, the Team with the most Decorations is declared the winner. If Teams are tied in Decorations, then the Team with the Character who has the most Health at the time the game ended is the winner. **The game will start with 15 turns, but more time can be added with the "Time Bonus" cards drawn from the Mansion.**

(B) GAME FLOW

Mercenary Mode is played in Teams. Every Player can either be on a Team by themselves (1 vs. 1 vs. 1 vs. 1, known as free for all), Teams of 2 (2 vs. 2 max) or, if one Player is more experienced than the others, 1 vs. 3.

MERCENARY MODE follows all the rules of STORY MODE, except that when an Infected is Defeated, it begins or continues a Combo Pile that the Team has started. (See the next section for "Combos").

Each game starts with 15 turns. Every time each Team has had a turn, a turn is subtracted from the remaining turns. There are ways of adding more. By adding more time, you can increase your score dramatically by extending your combo. It's up to you and your Team to decide how you want to play.

(C) OTHER RULES TO REMEMBER

Combos

A combo is a string of Defeated Infected that a Team has created as their Characters Explore the Mansion. When Exploring, follow the Instructions under "EXPLORING THE MANSION" in the STORY MODE section. (See Pg 14) In order to keep a Combo going, the Team must Defeat an Infected every turn in succession. For every Infected the Team Defeats, more Decorations can be earned.

When an Infected is Defeated, it is moved into the Team's Combo Pile. If, at the end of the Team's turn, they have a Combo Pile and did not Defeat any Infected that turn, the Decorations are determined and are written down and added to their total.

To determine the total Decorations in the Combo Pile, add up the printed Decoration amount on each Infected card ("Zombie(Male)", for instance, is worth 1) in the Combo Pile, then multiply that amount by the number of cards in the Combo Pile. After determining the total, write down the total Decorations your Team just earned, and move all of the cards in your Combo Pile to the bottom of the Mansion in any order your Team wishes. Note that the "Combo Bonus" card is not worth any Decorations on its own.

Here is the Blue Team's Combo Pile:

Failing to Defeat an Infected this turn, they start to total their Decorations up, with Zombie (Male) being worth 1 Decoration, Kipepeo worth 1, and the Licker β worth 3. This totals up to 5, but is then multiplied by the total number of cards in Blue Teams Combo pile, which was 3, giving them a total of 15 Decorations for this Combo

Leveling Up

Unlike the STORY MODE, Character's Levels are determined by how many Decorations the Team currently has. In other words, the Team members share the Decorations they earn.

Penalty for Losing all your Character's Health

When a Character's Health is reduced to 0 or lower in MERCENARY MODE, that Player is eliminated from the game. If the Health of all the Character's in a Team is reduced to 0 or less, that Team loses the game.

(GAME MODE 3) VERSUS MODE

PLAYERS NEEDED: 2 TO 4 PLAYERS
ESTIMATED PLAY TIME: 45 MIN TO 1 HOUR

You have successfully escaped the Mansion, along with all of the other survivors. Suddenly, one pulls a gun on the other, and so on, until a great standoff ensues. In order to stay alive, you must defeat your fellow survivors!

STEP 1: PICK A SCENARIO!

Choose 1 of the Scenarios from STORY MODE or MERCENARY MODE to be used for VERSUS MODE.

STEP 2: TAKE OUT THE MANSION FROM THE FIELD!

This game mode doesn't need the Mansion since Characters are now Battling each other instead. So, remove it from the game.

STEP 3: HAVE THE STARTING INVENTORY AND HAND READY!

Each Player takes the following cards from the Resource Area. Leave the remainder in the Resource Area, if there is any:

7 x Ammo x10 cards

1 x Handgun

2 x Combat Knife

Each Player shuffles these 10 cards together and places the pile face down in front of them. These cards are referred to as their Inventory. Then, each Player draws 5 cards from the top of their Inventory as their starting Hand.

You can also start with the Custom Starting Inventory made specifically for each Character, or you can mix and match custom setups. These Custom Starting Inventory setups can be found under MERCENARY MODE.(See Pg 24)

(A)VICTORY CONDITION
When a Character has Defeated another Character, they gain 1 Decoration. When a Character has earned 3 Decorations, the game ends and that Character's controlling Player is declared Victorious.

(B) GAME FLOW
When your Character Explores, instead of Revealing the top card of the Mansion, designate a Character. You are now battling that Character. Follow all rules detailed in the EXPLORING THE MANSION section(Pg 14), as if you had Revealed an Infected.

When a Character's Health is reduced to 0 or less, the Attacking Character's controlling Player can choose a Weapon from the Defeated Player's Inventory, Player Area, Hand, or Discard Pile and add it to their Discard Pile. The Defeated Player then shuffles all the cards in their Hand and Discard Pile into their Inventory and draws a new Hand of 5, and turns their Character face down. A Character flipped face down cannot be Attacked. On the Defeated Player's next turn, that Player can only flip up their Character and pass their turn.

Ex. Johnny chooses to Attack Bob's Character and does the right amount of Damage to reduce its Health to 0. Bob glumly flips his Character face down while Johnny looks through Bob's Inventory, Player Area, Hand and Discard Pile and decides to take his "Handgun"card and adds it to his Discard Pile. Bob shuffles all the cards in his Hand, Player Area, and Discard Pile together, draws a fresh Hand of 5, and turns his Character face up during his next turn.

LEVELING UP IN VERSUS MODE
Unlike the other two game modes, **only a single Decoration is needed to gain a Level in VERSUS MODE. If a Character has 2 Decorations, they are Level 2.**

EXTRA EXPLORES
If a Character has more than 1 Explore, they can Attack multiple Characters by using Weapons against different Characters. Designate the Characters you wish to Attack and Reveal your Weapon cards, selecting which Character each Weapon is being used on. Each Weapon can only be used once, unless stated otherwise.

Chapter VII. Terminology of the Game

There are some special terms used in this game. Learn them well and play correctly.

GAIN: Moving a card from Resource Area, Mansion Area, or from outside the game into a Player's Discard Pile.

ATTACH: Taking a card and placing it under your Character or Partner.

REVEAL: Show the indicated card to all Players.

TRASH: Moving a card to the bottom of its Resource Pile in the Resource Area.

Terminology of the Game (Cont.)

HEAL: Removing Damage from the Character by the indicated amount.

REMOVE FROM THE GAME: Move the card out of the game. It is no longer in the current game.

EXPLORE: Following the procedures designated on pgs 14-15.

DEFEAT: When your Damage is higher than or equal to the Health of the Revealed Infected.

PERMANENTLY DEFEATED: When a Characters Maximum Health is reduced to 0 or less.

+X CARD(S): As soon as the Player plays a card stating this, Draw X cards from their Inventory. If there are not enough cards in the Player's Inventory, that Player draws as many as they can, shuffles their Discard Pile, places the shuffled cards in their Inventory Area, then draws the rest. If the Player still does not have enough cards, then they draw as many as they can.

+X EXPLORE: The Player may Explore X times more during this turn.

+X ACTION(S): The Player gets X additional Actions during this turn. The instructions on the current Action card must be completed before the Player can play another Action card or moves on to an additional step.

+X BUY(S): The Player may Buy an additional X Resources during their turn. The extra Buy adds to the Players overall Buying amount and does not require a Player to immediately Buy.

+X GOLD: The Player has an additional X Gold for the turn to Buy Resources with.

+X AMMO: The Player has an additional X Ammo for the turn to use Weapons with.

ATTACK: A Player using 1 Explore to have their Character deal Damage to another Character.

Box Layout & Game Content

Remove all of the cards from their wrappings and separate them into their individual cards. Then, remove the dividers from their wrappings, and organize your cards based on what cards are named on the dividers. "Resident Evil™: Nightmare" also comes with dividers for "Resident Evil™: The Deck Building Game" and "Resident Evil™: Alliance". The dividers for "Resident Evil™: Outbreak" can be found in the Outbreak set.

Card no.	Card name	Total amount
